

TOPSoccer is a community based recreational program specifically designed to help athletes with physical and/or mental disabilities play soccer. The main goal of this program is to facilitate challenged player participation in team sports. Please see more details in our brochure below:

We are reaching out to local high schools and other teenager educational programs to volunteer their community service time and help us assist our players for one to two hours a week.

We are looking for patient, caring, and enthusiastic individuals who are willing to be a soccer “buddy” for our athletes during practice. Basically, we are asking the “buddy” to pair up with a challenged athlete and assist him/her during practices. You can come once or every week, whatever your schedule permits.

More details will be given at the beginning of each practice, No soccer knowledge necessary, but it is always welcome.

If interested, please email back to me and we will register you for our next session.
